ViroGuard® Heavy-Duty Wash Out Suit

Item #2407 | 25 / Case

High chemical and biohazard splash resistance to liquids such as blood, blood-borne pathogens, Sulfuric Acid, Sodium Hydroxide, Bleach, N-Hexane, Tetrahydrofuran, & more.

Seamless shoulders, elastic in back, and a reinforced crotch enhance mobility and tear- resistance in high movement areas to prevent rip outs when squatting, kneeling, or reaching.

Fabric passes ASTM F1670 and F1671 tests for protection against blood, bodily fluids, & blood-borne pathogens.

High Moisture Vapor Transmission Rate (MVTR) allows heat and moisture vapor to escape before it condenses into sweat to prevent heat build up.

A full-length zipper is quick and easy for donning & doffing. A storm flap zipper cover protects seams from liquids and particulates.

Elastic wrists & ankles help keep sleeves and pant legs securely in place to prevent skin exposure.

MicroGuard MP® Standard Microporous Wash Out Suit

Item #8015 | 25 / Case

A full-length zipper front is quick and easy for donning & doffing. A storm flap zipper cover protects seams from liquids and particulates.

Elastic wrists & ankles help keep sleeves and pant legs securely in place to prevent skin exposure.

Fabric passes ASTM F1670 for protection against blood. High chemical and splash resistance to liquids such as blood, bleach, oils, isocyanates, & more.

High Moisture Vapor Transmission Rate (MVTR) allows heat and moisture vapor to escape before it condenses into sweat to prevent heat build up.

Seamless shoulders, elastic in back, & a reinforced crotch enhance mobility and tear- resistance in high movement areas to prevent rip outs when squatting, kneeling, or reaching.

Passes ASTM F 2299 tests for both wet and dry particle filtration efficiency with zero particle penetration.
